Summary

Full-Stack Developer and Senior Computer Science student delivering production-ready web and mobile applications with measurable business impact. Proficient in React, TypeScript, Node.js, PostgreSQL, and AWS, with a track record of reducing costs by 40%+ and building platforms for 22,000+ users. Skilled in REST APIs, microservices, CI/CD, real-time systems, Docker, automated testing, and agile workflows.

Work Experience

Cha Bar Bistro and Maki Express Ramen House — Software Engineer (Freelance)

Cincinnati, OH | June 2025 – July 2025

- Architected and developed a comprehensive business management platform with real-time synchronization capabilities across multiple user interfaces.
- Engineered native Android application with live push notifications to streamline staff communication and order coordination.
- Built secure user authentication system with role-based access for different staff levels.
- Reduced payment processing fees from 5% to 2.9% by implementing a custom payment solution.
- Engineered inventory tracking and substitution algorithms for dynamic updates across connected interfaces.
- Delivered a mobile-first UI with authentication, history tracking, and account management.

Nittha Siam Kitchen — Web Developer (Freelance)

Highland Heights, KY | Feb 2024 - Mar 2024

- Built a responsive website using HTML, CSS, and Bootstrap, delivering a clean, modern, and mobile-friendly interface.
- Designed interactive UI components that improved navigation and reduced order placement time, contributing to an estimated $1,000/day increase in pickup order value.
- Enhanced accessibility and SEO, resulting in 1,000+ monthly active users and 21,000+ pageviews.
- Restored full site functionality during a critical outage in under one hour, minimizing downtime.

Pintoh Asian Restaurant — Web Developer (Freelance)

Cincinnati, OH | Apr 2024 – May 2024

- Created a custom CMS-driven WordPress platform with a mobile-first responsive design.
- Integrated modular plugin architecture for easy feature expansion and optimized site SEO for increased discoverability.

Headstarter AI Fellowship — AI Developer

Remote |Aug 2024 – Sep 2024

- Developed the front-end for a domain-specific AI chatbot using OpenAI APIs and vector-based retrieval.
- Collaborated in a four-person team to provision and manage scalable AWS EC2 infrastructure for deployment.

Education

BSc, Northern Kentucky University — Computer Science, Minor in Mathematics | Aug 2022 – May 2026
